

Please do not the FCC implement any proposal that would lessen Indiana's Telephone Privacy law protections. This would be a injustice to the citizens of Indiana who have already been provided with the improved quality of life and privacy.

We use to be bothered at all times of the day and evening with these unwanted calls. We are trying to improve family values by having UNDISTURBED FAMILY DINNERS, time to spend together after busy days and quality quite time for homework for our daughter. This has been greatly improved since the implementation of the Indiana law.

In fact, the FCC would be doing the families of the nations a disservice by offering them anything less than Indiana has already offered it's residents. I hope that ALL others states are able to use Indiana's Telephone Privacy program and provide this service to it's residents. After all, we were all given the opportunity to put our number's on the list to avoid these call, or not.
